

Copper Tube Terminals

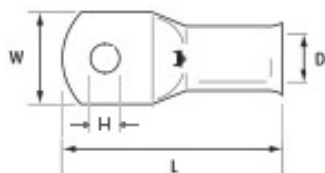

Our copper tube terminals are manufactured from seamless copper tube to BS2871/C106

All terminals are provided with an inspection hole to ensure that the cable has been fully inserted into the terminal prior to crimping.

A bell mouth helps to prevent chafing in instances where the assembly may be subject to vibration.

All Crimp 'n' Fix terminals fully comply with BS EN 61238-1-2003

Crimp 'n' Fix Pt.No.	Cable size mm ²	Hole Size H	Width W	Length L	Inside Dia D	Tab Thickness
CCT211005	10	5.1	10.4	30	4.5	1.7
